

Beset with Difficulties

IS ENGLAND'S PREMIER.

So is the man who has a large stock of spring clothing on hand at high prices.

A war between England and Russia may affect prices of certain products, but it will not affect the price of clothing. It is already too low, and will probably never be lower.

We show handsome English Serge Suits at \$15 in Sack and Cutaway Coats. When could they have been bought for that money before?

We make to-day large additions to our already large stock of pieces goods, from which we make suits to order at \$22, \$25, \$28, and \$30.

A fine line of the celebrated "Harris" and "Sawyer" Cassimeres. Examine them.
